Safety Information

About Photosensitive Seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these "photosensitive epileptic seizures" while watching video games.

These seizures may have a variety of symptoms, including lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms—children and teenagers are more likely than adults to experience these seizures.

The risk of photosensitive epileptic seizures may be reduced by sitting farther from the television screen, using a smaller television screen, playing in a well-lit room, and not playing when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

Other Important Health and Safety Information. The Xbox Instruction Manual contains important health and safety information that you should read and understand before using this software.

Avoid Damage to Your Television

Do not use with certain televisions. Some televisions, especially front- or rear-projection types, can be damaged if any video games, including Xbox games, are played on them. Static images presented during the normal course of gameplay may "burn in" to the screen, causing a permanent shadow of the static image to appear at all times, even when video games are not being played. Similar damage may occur from static images created when placing a video game on hold or pause. Consult your television owner's manual to determine if video games can be played safely on your set. If you are unable to find this information in the owner's manual, contact your television dealer or the manufacturer to determine if video games can be played safely on your set.

Unauthorized copying, reverse engineering, transmission, public performance, rental, pay for play, or circumvention of copy protection is strictly prohibited.

SAVING THE GAME

Throughout the game, you'll find S.H.I.E.L.D. Access Points. These will allow you to save your game. You can also add or remove characters from your current Team, and extract your Team to any other S.H.I.E.L.D. Access Point you've already found.

CHANGING CHARACTERS

You'll notice the four portraits in the lower left corner; each one represents one of the Super Heroes currently on your Team. Press the corresponding directional on the directional pad to take control of that character.

COMBAT BASICS

The action in *Marvel™ Ultimate Alliance* comes at you fast and furious. Here are the basics to help keep you on your feet:

BLOCKING AND DODGING

Press and hold the **left trigger** to block incoming attacks, an especially useful tactic when battling a boss or facing a room full of enemies. Press the **left trigger** while moving to dodge. Stay out of the path of ranged attacks, or use it to quickly flank shielded enemies.

DOUBLE-JUMPING AND FLYING

If you press the **Y** button to jump, and press it again while in the air, you'll perform a double-jump, allowing you to make it across large gaps and reach otherwise inaccessible areas. If your Super Hero has the ability to fly, pressing the **Y** button while in the air will make him fly; use the **X** button to return him to earth.

Some Super Heroes have special abilities that aren't quite flying but are more than a jump (like Iceman with his Ice Slide). For these Super Heroes, press the **Y** button to jump, then press and hold the **Y** button to activate their Powers.

SWIMMING

At points during *Marvel™ Ultimate Alliance*, you'll find yourself traveling underwater. Press the **Y** button repeatedly to swim; if you stop pressing the button, your Super Hero will slowly drift back to the ocean floor.

WIELDING WEAPONS

Scattered about different levels are weapons that your Super Heroes can pick up and wield; you'll be able to identify them by the sparkling glow around them. Press the **X** button to pick them up, and the **A** button to attack with them. These weapons are significantly stronger than your Super Heroes' normal melee attacks, but will break after some use.

MELEE COMBOS

Pressing the different attack buttons in succession will allow you to perform melee combos with additional damage bonuses or special effects. Some examples:

- Knockup Attack **A**, **A**, **B** buttons
- Trip **A**, **B**, **A** buttons
- Stun **A**, **B**, **B** buttons
- Flying Smash While in mid-jump, press and hold the **A** or **B** button

GRAPPLING COMBOS AND THROWING

When battling, press the **X** button to grapple with your enemies. From here, there are several options:

- Throw Move the **left thumbstick** in any direction to throw the enemy in that direction.
- Melee Combo Repeatedly press the **A** button to attack the enemy while holding them in place.
- Smash Combo Press the **B** button to perform a special smash attack.

You can also grapple with enemies carrying shields and weapons, to rip their gear out of their hands.

HEALTH ORBS, ENERGY ORBS AND S.H.I.E.L.D. CREDITS

As your Team battles against the forces of Dr. Doom, you'll take damage to your health and use up your energy, calling upon your Special Powers. In order to replenish your health and energy, you'll have to collect the Health and Energy orbs (red and blue) that pop out when enemies are defeated. The orbs may also appear when objects in the environment are destroyed, so leave no crate unpunched!

Enemies and objects will also drop S.H.I.E.L.D. credits, which can be used to improve your outfits. (See the Character Outfits section on page 10 for further details.)

Note: The orbs will naturally gravitate toward the Super Hero most in need. If all of your Super Heroes have full health and energy, any orbs collected will be converted into XP.

ADVANCED TACTICS

SPECIAL POWERS

Each of your Super Heroes has Special Powers that define them as a Marvel Super Hero. Some are offensive, some are boosts for your Team, and some are powerful enough to change the tide of the most difficult boss battle.

To use your Special Powers in battle, press the **right trigger** to bring up the menu. There are four icons, each one mapped to the **A**, **B**, **X** or **Y** button. Press the appropriate button to use the specific Power.

Note: You have to have enough energy to use the Power. (See the Character Powers section on page 10 for further details on Special Powers.)

HOT-SWAPPING POWERS

Each of your Super Heroes has more than four Powers...so how do you access the Powers not already assigned to a button? Hot-Swapping gives you access to all of your Powers on-the-fly.

Press the **right trigger** to bring up the Special Powers icons, and then press a direction on the directional pad towards one of the four icons. This brings up another series of icons, which represents the other Powers that can be assigned to that button. Continue to press the **directional pad** to cycle through all of the available Powers.

WOLVERINE'S RAGE

He's the best there is at what he does, but what he does best isn't very nice.

You'll notice next to Wolverine's Health and Energy bars a series of dots that gets filled in as he deals out damage to enemies. This is his Rage meter, and when it's full, he enters his Berserker state, and gets a whole new set of Special Powers that deals out extra damage and mayhem.

As a trade-off, Wolverine will only gain a new point to increase his Powers every other level.

COMBOS

The best part of a Super Hero Team is when your heroes work together. When two Special Powers hit the same target at the same time, you'll do bonus damage to the target. You can use the Team Commands to make your Team members attack with a Special Power, and then time your own Powers to take down tough enemies.

TEAM COMMANDS

It's important for everyone on a Team to be battling together, and Team Commands give you control over how your AI Teammates act.

Press the **White** button to bring up the Team Commands icons. While holding down the **White** button:

- Press **↑** on the directional pad to set your Teammates to Aggressive (immediately attacking the enemy you have targeted).
- Press **↓** on the directional pad to set your Teammates to Defensive (attacking only when attacked).
- Press **←** or **→** on the directional pad to set your Teammates to Normal (attacking nearby enemies and defending themselves).

SPECIAL ENEMIES

Many of the enemies you'll encounter in the course of the game have their own Special Powers and equipment; you'll be able to identify many of them by the glowing rings around their feet. Make sure you're aware of them while you're battling, as some of their Special Powers will radiate out, affecting all other enemies in the area.

BOSS BATTLES

As much as some Super Heroes would prefer to just charge in, pound away at the bad guys, and see who's left standing at the end, some foes require more brains than brawn in order to defeat them. When encountering a particularly difficult battle, take a moment to look around your environment for clues. Sometimes, with a little planning and good timing, you can defeat seemingly invulnerable enemies without throwing a single punch.

IMPROVING YOUR CHARACTERS

As you progress through the game, your Super Heroes will gain XP in a variety of different ways: defeating enemies, defeating bosses, completing levels, absorbing extra Health and Energy orbs, and more. When one of your Super Heroes has accumulated enough XP, they will gain a new level of Stats and Powers.

CHARACTER POWERS

To view a Super Hero's Stats and Powers, go to the Hero Management Menu (from the Pause Menu, or press the **SELECT** button to go there directly), and then press the **B** button to access a Super Hero's detailed information.

Increasing Powers

When a Super Hero gains a new level, you'll be able to assign a point to improve one of their Powers. This will increase the damage done, or duration of the boost, but it will also increase the energy cost of the Power.

Assigning Powers

You can also assign specific Powers to buttons in this menu. Use this menu in combination with the Hot-Swapping icons to make sure that all of your Super Heroes' Powers are ready to use.

Character Outfits

Your Super Heroes will all start out with their default outfits, which have bonuses that can be upgraded using the S.H.I.E.L.D. credits you collect. As you progress through the game, you'll be able to unlock new outfits for your characters, with different bonuses that can also be upgraded.

Character Gear

Certain enemies will drop special items that your Super Heroes can equip. Pay close attention to what bonuses the Gear gives, as you can only have one piece of Gear equipped at a time.

Character Stats

This is where you can review your Super Heroes' stats.

Auto-Leveling and Auto-Assigning

The Powers and Gear menus have an option at the bottom which determines whether or not the game will automatically assign points to Powers when you level, and Gear when it's picked up. By default it is set to Automatically Assign; press the **Y** button to toggle this feature on and off.

IMPROVING YOUR TEAM

As you progress through the game, not only will your Super Heroes gain levels, so will your Team. When your Team defeats enemies, rescues civilizations and just generally saves the day (as Teams of Super Heroes tend to do), it will increase your Team's Reputation and you'll be given special bonuses.

To access the My Team Menu, go to the Hero Management Menu and press the **right trigger**. Here, you can see the specific bonuses your Team can improve, as well as your Team's name, logo and roster. You can also see how you stack up next to some of the classic Teams in Marvel history.

Note: The bonuses you gain for your Team only apply when all four members of the Team are together. If you swap one character out in favor of a new one, well, that's a whole new Team, and you'll lose 50 reputation points every time you change out a character.

THE S.H.I.E.L.D. SIMULATOR

Throughout the world of *Marvel™ Ultimate Alliance*, you'll find S.H.I.E.L.D. Simulator discs. These allow you to access the S.H.I.E.L.D. Simulator, and review some of the most iconic moments in the histories of each of the major Super Heroes in the game. And not only will you get to see what happened, you'll be able to play out the entire encounter. When you find a S.H.I.E.L.D. Simulator disc, you'll immediately be given the option to pause your current game and enter the S.H.I.E.L.D. Simulator. Don't worry about your current game: it will be saved, and after the simulation session is over, you'll be returned right where you were when you found the disc. If you don't want to pause in your current game, you can access the S.H.I.E.L.D. Simulator later, either directly from a S.H.I.E.L.D. Simulator console or in any of the game's Hub Zones.

MULTIPLAYER

OFFLINE

At any time while playing *Marvel™ Ultimate Alliance*, a friend can sit down on the couch next to you and join in. Just plug in a second controller (or third, or fourth), and press the  button.

When the  button is pressed on the second controller, the HUD divides into four parts, one for each Super Hero available on the team. You'll still be able to switch to a free Super Hero on your Team, at any time, by pressing the correct directional button. When playing with three other players, you are unable to swap characters. Also, when a new player joins, you are given the option of which Multiplayer mode you would like to play.

COOPERATIVE MODE

In this mode, you and your friends will be able to play through the entire game, battling alongside each other to defeat Dr. Doom.

Note: During a Cooperative Simulator mission with only one Super Hero, the other players will be controlling the enemies that Super Hero is battling. You can switch between free enemies by using the directional pad, just as you can with the Super Heroes in Cooperative Story mode.

ARCADE MODE

In this mode, not only will you and your friends be trying to save the world from Dr. Doom, you'll also be competing against each other. The game will track the damage each Super Hero delivers, the number of knockouts and several other stats, and then let you know at the end of the level which of you is the "Most Valuable Hero." Look for bonuses hidden in levels to boost your competitive stats. Additionally, at the end of a mission, one player will be crowned the Mission Winner.

Note: In Arcade mode, you're unable to change characters during the course of a level. If you change Super Heroes in between levels, all of your accomplishments will be reset to zero for your new Super Hero.
